

Success Story

Client Solutions Helps Leading FMCG Migrate to New SAP Platform, Business All-in-One, Within Tight Timeframe

The Challenge

Carroll Cuisine, an Irish producer and distributor of branded cooked meats, completed a management buyout in 2015. The company migrated from a shared single SAP Environment. As a new entity, the business needed to move to its own platform and the migration was required to be completed within the timeline of four months. Carroll Cuisine invited a number of SAP partners to bid for the project and present their credentials to a selecting panel. The scope included ERP, BW, BI, PI, retention of company data and customisation.

The Solution

Client Solutions was successful in this process because of our ability to provide a one stop shop for the company's requirements.

This included:

- 24/7 Hosting Managed Services
- SAP software and maintenance
- Implementation and training services

Our approach was three pronged:

1. The existing ERP system was transitioned to Business All-in-One using the client copy. All functionality and customisation was retained with the data migrated separately.
2. PI greenfield implementation replaced the original Seeburger system.
3. BW greenfield was implemented using existing structure as a reference.

The migration project was delivered with the help of our local support team who were involved throughout the project and ensured a smooth transition post go-live of the new environment.

The Result

Client Solutions successfully completed the project within the designated timelines, helping to fulfil the necessary obligation of coming off the parent system. Our SAP experts helped the company to benefit from a seamless transition with minimised impact to their business. The new system has helped the company in a number of ways, including:

- The business now has greater control and visibility of key areas allowing for enhanced business decisions.
- Moving to a single standalone platform has improved the efficiency and performance of many core processes.

About Carroll Cuisine

- Irish producer and distributor of branded cooked meats, ready meals and other chilled food products in Ireland
- Founded in 1979, completed management buyout in 2015
