A user-based evaluation of the surfing behaviour of users by means of the session cookies does not take place.

6. Log Files

Each time a site is called up access data are stored in a protocol file, the server log. The data record which is stored in doing so contains the following information:

This serves to optimize the Client Solutions website, for instance by analysing user behaviour with respect to dates and times and the data volume called up on the Client Solutions website. In addition, Client Solutions can spot possible errors through the log files, e.g. defective links or program errors, and therefore use the log files for improving and further developing the Client Solutions website. Client Solutions cannot link the called up sites and uses stored in the server log to determinable persons.
